

PAPER 1 / QUESTION 138

5 November 2025 / TZ3 (file label) / HL Paper 1A / original question 6 / 8825-6719

138. A pump has efficiency η when raising water from a well of depth d . The mass of water raised per second is R . Changes in kinetic energy of the water are considered negligible.

What is the input power to the pump required to raise the water?

- A. $\frac{Rd}{\eta g}$
- B. $\frac{\eta R}{gd}$
- C. ηRgd
- D. $\frac{Rdg}{\eta}$
