

PAPER 1 / QUESTION 141

4 November 2021 / TZ0 / HL Paper 1 / original question 24 / 8821-6501

141. A fuel has mass density ρ and energy density u . What mass of the fuel has to be burned to release thermal energy E ?

A. $\frac{\rho E}{u}$

B. $\frac{uE}{\rho}$

C. $\frac{\rho u}{E}$

D. $\rho u E$
