

PAPER 2 / QUESTION 15

3 November 2022 / TZ0 / HL Paper 2 / original question 1 / 8822-6502

15. A raindrop falls vertically from rest.

(a) State the initial acceleration of the raindrop.

[1]

.....
.....

The graph shows how the speed of the raindrop varies with time t .

(b) Explain, by reference to the vertical forces, how the raindrop reaches a constant speed.

[3]

PAPER 2 / QUESTION 15

3 November 2022 / TZ0 / HL Paper 2 / original question 1 / 8822-6502

(Question 15 continued)

- (c) During the first 3.0 s of motion, the raindrop falls a distance of 21 m and reaches a speed of 9.0 m s^{-1} . The mass of the raindrop is 34 mg. The temperature of the raindrop does not change.
- (i) Determine the energy transferred to the air during the first 3.0 s of motion. State your answer to an appropriate number of significant figures. [3]
