

PAPER 1 / QUESTION 3

8820-6501 / original question 3

3. A body is held in translational equilibrium by three coplanar forces of magnitude 3 N, 4 N and 5 N. Three statements about these forces are

- I. all forces are perpendicular to each other
- II. the forces cannot act in the same direction
- III. the vector sum of the forces is equal to zero.

Which statements are true?

- A. I and II only
- B. I and III only
- C. II and III only
- D. I, II and III
