

PAPER 1 / QUESTION 124

2225-6719 / original question 2

- 124.** Two balls, P and Q, are projected from the edge of a cliff. P is projected horizontally at speed v and Q is projected vertically upwards at the same speed. The time taken for P to reach the ground is t_p and the speed at impact with the ground is v_p . **Air resistance is negligible.**

What is the time taken to reach the ground and the speed at impact with the ground for Q?

	Time taken	Speed at impact
A.	t_p	v_p
B.	t_p	Greater than v_p
C.	Greater than t_p	v_p
D.	Greater than t_p	Greater than v_p
